- Save up to 25 favorite contacts in your phonebook
- Caller ID - so you always know who is calling
- Privacy protection with silence mode and mute mode
- Hearing aid compatible - reduces unwanted noise

PHILIPS

Scala design corded phone
Black and White

M110W/51

Highlights

2.75" white on black display

High contrast, 7cm (2.75") white on black reverse display

25-name phone book

Always have the phone numbers of your loved ones available: Save up to 25 names in your phonebook.

Caller ID

Sometimes it is good to know who is calling before you answer. And our Caller ID lets you keep track of who is on the other end of the line.

Cleverly hinged display

Cleverly hinged display offers you a clear view of the phone display from any angle – whether the phone is placed on a tabletop or mounted on a wall. Large, high contrast white-on-black reverse LCD and large font characters ensure added comfort and effortlessness in reading the display.

Comfortable handset

Comfortable, perfectly weighted handset for longer calls

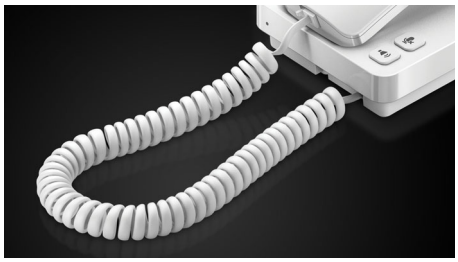
Event LED

The red Event LED that's nicely integrated in the display will blink to alert you whenever there's a missed call. With the smart CallLog feature, you can easily check which call you missed with just the touch of a button.

Hearing aid compatible

This feature enables the phone to couple with the hearing aid to amplify conversation while reducing ambient noise and the buzzing, humming, or whining noise that can otherwise occur.

Radiation-free



Corded phones do not emit any harmfull radation as the connection between the base and the handset is made through a coiled cord.

Secure connection at any time

Corded phones do not rely on the power supply from the electrical outlet since the power required for their operation is directly sourced from the landline cable. This makes corded phones one of the most reliable communication choices, especially during power cuts. With the coiled cord connecting the comfortable handset to the base, you will always be able to find your handset. Enjoy long, hassle- and worry-free communication – anytime!

Silence mode and mute mode

Privacy protection with silence mode and mute mode

Speakerphone

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.
